SCULPTOR

BROMMAGE / BROMASS

The perfect duo for preparing eyebrows to tinting

THE RESULT OF EYEBROW TINTING

depends not only on the tint quality and the brow artist's professionalism.

In order for it to be really perfect, it is very important to carefully prepare the eyebrows to the procedure. In order for the eyebrow tint to lie down evenly, providing effective dyeing of hairs and creating the desired stain on the skin, it is necessary:

- clean the eyebrows and skin from dead cells, if there is peeling — eliminate it
- close gaps in the lipid layer of the hairs
- moisturize the skin and optimize the water balance of the stratum corneum

TO ENSURE THAT BROMMAGE AND BROMASS PRODUCTS DELIVER PERFECT BROW MOUSTURIZING, WE'VE ENRICHED THEM WITH THE UNIQUE HYMAGIC™ - 4D (4D HYALURONIC ACID) COMPLEX

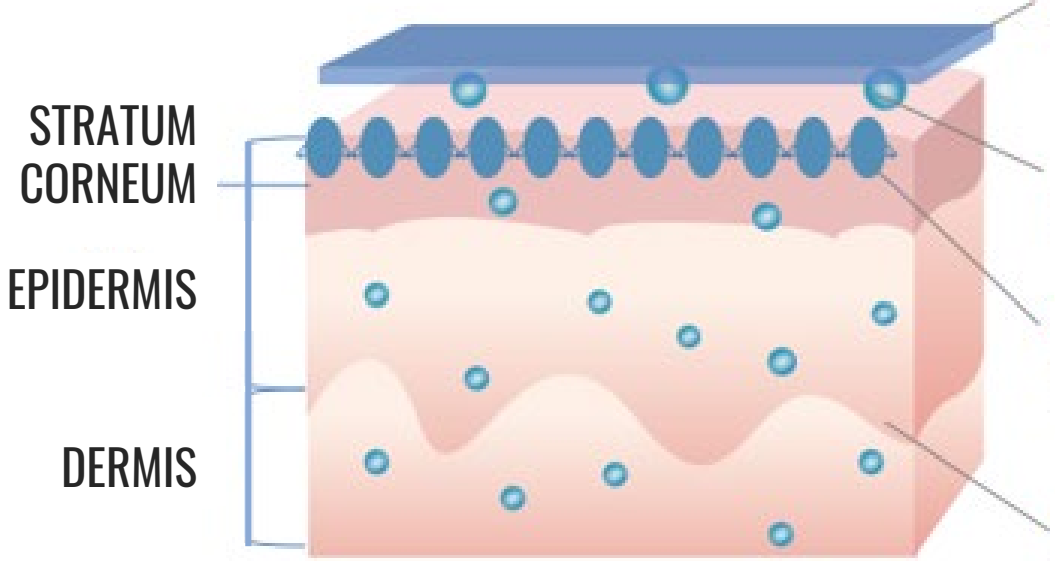

It contains 4 forms of hyaluronic acid: low- and high-molecular, polymer, acetylated and hydrolyzed

4D HA

Accurately target different skin layers
Three-dimensional moisturizing

HYACROSS (SODIUM HYALURONATE CROSSPOLYMER)

Protective film, anti-pollution/anti-UV, 24h moisturizing

HA (SODIUM HYALURONATE)

Holding water on surface

HYMAGIC-ACHA (SODIUM ACETYLATED HYALURONATE)

Superb hydrating, repair corneum barrier function

miniHA (HYDROLYZED SODIUM HYALURONATE)

Transdermal absorption, deep moisturizing. repair damaged cells, anti-oxidation and anti-aging

PROPERTIES AND BENEFITS OF THE COMPLEX HYMAGIC ™ - 4D (4D HYALURONIC ACID)

High molecular weight

01 **SODIUM HYALURONATE**

retains water on the skin surface.

Acetylated

02 **SODIUM ACETYLATED HYALURONATE (Hymagic-AcHA)**

with hydro- and lipophilic properties restores the skin's protective barrier, reduces dryness and roughness, and provides long-lasting moisturization for 12 hours.

Cross-linked polymer

03 **SODIUM HYALURONATE CROSSPOLYMER (Hyacross™),**

reinforced with moisturizing pentylene glycol, forms a dense, breathable membrane on the skin. This restores the stratum corneum elasticity and optimizes its water balance, eliminates the feeling of tightness and peeling. Hyacross™ elastomer also provides powerful long-term hydration, reduces the negative effects of UVA and UVB rays, increases resistance to hyaluronidase, rejuvenates and smoothes the skin, protects it from excessive dust contamination.

Low-molecular

04 **HYDROLYZED SODIUM HYALURONATE (miniHA™)**

is very quickly adsorbed by the skin and regenerates it from within, protects it from free radicals, slows down the aging process, reducing wrinkle depth by up to 25%. In synergy with high-molecule HA miniHA™ acts as effectively as possible. The component penetrates very deeply, intensively moisturizing the epidermis and dermis.

BROMMAGE

soft formula for gentle skin exfoliating and hydration

GOMMAGE BENEFITS

- gently removes dead skin cells
- has a gommage hardness level of +/++
- carefully prepares brows to the tinting procedure
- provides long-term moisturizing
- activates protective functions of skin cells

The gommage is based on:

COCONUT OIL
CAPRYLIC/CAPRIC TRIGLYCERIDE
SPRAYSPHERES® COLOR SPHERES

01 Thanks to the first two components, the gommage has a pleasant cream-oil texture. Peeling particles slip gently on the skin without damaging it.

02 Sprayspheres® are microscopic spheres that gently remove dead cells from the surface of the epidermis and cleanse the eyebrow hairs of smog and lipids. The pink and green spheres refresh the treatment area and brighten the skin immediately.

03 The 0.6-0.8 mm green spheres contain aloe vera oil and are biodegradable. The spheres nourish the hairs and skin, and disappear completely during the scrubbing procedure, leaving no marks on the brows.

04 BROMMAGE also contains watermelon extract, a complex of fermented oils and the powerful HYMAGIC™ - 4D complex with four forms of hyaluronic acid: low- and high-molecular, polymer, acetylated and hydrolyzed.

WATERMELON EXTRACT POWER: PROPERTIES

- Soothing and moisturizing effect
- ANTI-AGE effect
- Photoprotective properties
- Calming
- Protects skin and hairs from oxidation processes
- Gentle peeling effect
- Antioxidant effect, protection against free radicals
- Toning and restoration of the skin
- Epidermis nutrition
- Increase hair volume, boosting growth

FERMENTED OIL COMPLEX

Active ingredients:

PSEUDOZYMA EPICOLA/APRICOT KERNEL OIL/OLIVE FRUIT OIL/SUNFLOWER SEED OIL/SWEET ALMOND OIL/(ANGELICA GIGAS/LITHOSPERMUM ERYTHRORHIZON) ROOT EXTRACT FERMENT EXTRACT FILTRATE

Fermented angelica, apricot kernel, olive, sweet almond and sunflower seed oils are obtained using patented Korean technology. Thanks to the special enzymes of the fungus Pseudozyma sp., involved in this process, the components of the vegetable oils are transformed. The result is a melting consistency, leaving no greasy gloss and unpleasant feeling of stickiness.

Fermented angelica (shikon) oil is rich in a special component (shikonin). It is capable of regenerating cells, relieving inflammation and enhancing the regulation of metabolic processes. In addition, shikonin acts as a color stabilizer and prevents rapid discoloration.

BROMMAGE INGREDIENTS:

Aqua, Cocos nucifera oil, Caprylic/capric triglyceride, Microcrystalline cellulose, Glycerin, Cetearyl alcohol, Pentylene glycol, Parfum, Glyceryl stearate, Sodium olivoyl glutamate, Lactose, Pseudozyma epicola/Soybean flour/Apricot kernel oil/Olive fruit oil/Sunflower seed oil/Sweet almond oil/Angelica gigas root extract ferment extract filtrate, Aloe barbadensis extract, Citrus limon peel oil, Tocopherol, Sodium acetylated hyaluronate, Sodium hyaluronate, Sodium hyaluronate crosspolymer, Hydrolyzed sodium hyaluronate, Citrullus lanatus fruit extract, Ricinus communis seed oil, Castor oil propanediol esters, Hydroxypropyl methylcellulose, Laureth-7, Xanthan gum, C13-14 isoparaffin, Lactic acid, Mica, Chromium hydroxide green, Tin oxide, Titanium dioxide, Ethylhexylglycerin, Polyacrylamide, Phenoxyethanol, Potassium sorbate, Sodium benzoate, Silica, CI 73360, CI 16255, d-Limonene.

BROW EXFOLIATING PROCESS PROTOCOL WITH BROMMAGE

01 — Clean eyebrows with FESTA foam by SCULPTOR

02 — Apply gommage in the direction of hair growth

03 — Gently trace along the eyebrows growth line

04 — Remove product residue with a damp cotton pad

For home care use no more than 1-2 times a week

Date	07/03/2023

BROMASS

intensive moisturizing, soothing and restoring

EYEBROW MASK BENEFITS

- suitable for sensitive skin
- provides hair conditioning
- visibly softens and soothes the skin
- makes the hairs shine by filling the voids in the lipid layer
- effectively moisturizes the skin
- has a light cream-mousse texture for comfortable application
- does not leave a sticky feeling on the skin

01 The product with a pronounced soothing and moisturizing effect contains a plant complex FILAGRINOL N-P with oils, pollen extract and unsaponifiable wheat fractions, as well as a powerful complex HYMAGIC™ - 4D with four forms of hyaluronic acid: low- and high-molecular, polymer, acetylated and hydrolyzed.

The mask is based on:

- CAPRYLIC / CAPRIC TRIGLYCERIDE
- BUTYROSPERMUM PARKII (SHEA) FRUIT BUTTER

02 Effects: plant esters provide easy sliding on the skin and conditioning of the hairs. These components fill the gaps in the lipid layers of the hairs well, providing them with a glossy shine. Shea butter gives the mask a creamy structure and softens the skin.

PROPERTIES AND ADVANTAGES OF FILAGRINOL N-P COMPLEX

ACTIVE INGREDIENTS:

pollen extract and fractions of unsaponifiable wheat, soybean and olive oils.

The special complex FILAGRINOL N-P

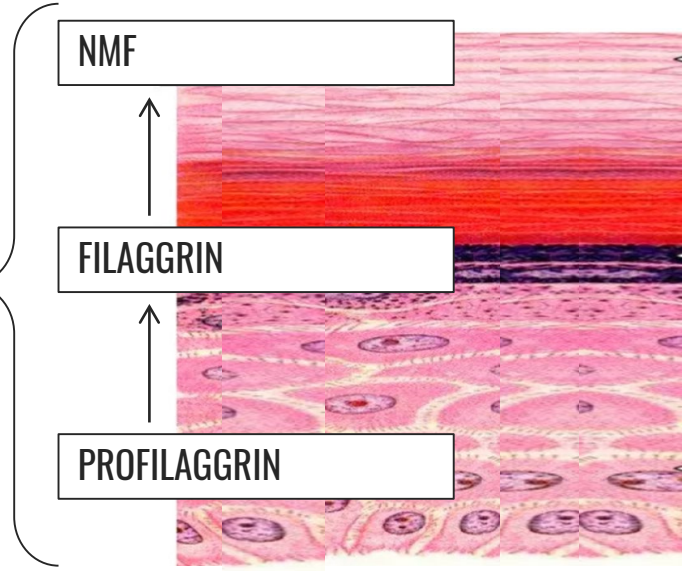

acts as a modulator of the synthesis of filaggrin, which:

- participates in the physiological process of keratinization
- is important for the integrity of the epidermal barrier
- has antioxidant and antilipoperoxidant activity
- ensures adequate moisturization of the epidermis
- prevents skin aging

About **50%** (30% in Europe) of patients with atopic dermatitis have mutations in the filaggrin gene

THE STRATUM CORNEUM

Filaggrin is the main protein, the breakdown of which in the stratum corneum of the epidermis produces amino acids (components of the natural moisturizing factor) that can retain water in the epidermis.

BROMASS INGREDIENTS:

Aqua, Caprylic/capric triglyceride, Cetearyl ethylhexanoate, Cetearyl alcohol, Butyrospermum parkii butter, Pentylene glycol, Glycerin, Parfum, Glyceryl stearate, Sodium olivoyl glutamate, Aluminum starch octenylsuccinate, Triticum vulgare germ oil unsaponifiables, Olea europaea oil unsaponifiables, Glycine soja oil unsaponifiables, Pollen extract, Sodium hyaluronate crosspolymer, Sodium acetylated hyaluronate, Sodium hyaluronate, Hydrolyzed sodium hyaluronate, Tocopherol, Ethylhexylglycerin, Sodium phytate, Xanthan gum, Lactic acid, Phenoxyethanol, Linalool, Hexyl cinnamal, Limonene, Citronellol, CI 16255.

BROW HYDRATING PROCESS PROTOCOL WITH BROMASS

The mask should be used after exfoliating with SCULPTOR BROMMAGE gommage scrub and removing its residue with a damp cotton pad.

01 — To moisturize the eyebrows, apply the product in a medium layer. Exposure time should be selected depending on the skin type. Oily — 1-2 minutes, normal and combined — 3-4 minutes, dry — 5 minutes.

02 — Remove the product residue with a damp cotton pad and wait until the hairs and skin are completely dry.

For home care use 1-2 times a week
